Toledano Asks Probe of CIA

MEXICO CITY, Sept. 27 (AP) — Leftist labor leader Vicente Lombardo Toledano said that the government should investigate the activities of the U.S.'s C.I.A. in Mexico.

According to the veteran leader, some C.I.A. agents tried to bribe two members of the Social Popular Party to obtain information on its political activities, and then threatened them.

Lombardo said in a press conference that he has evidence of this and that the "behavior of these foreign spies and their eventual relations with Mexican authorities and social and political organizations should be investigated."
